

Flight Sim Messenger (FSM) released, allowing multi network, multi aircraft, multi simulator access to PDC & CPDLC functionality.

fsm.vsrsoftware.com

London 5th September; 2024 Delta Bravo Zulu, the developers of the popular [VSR](#) product, are pleased to announce the release of Flight Sim Messenger (FSM), a standalone messenger for the flight Sim environment.

FSM is a 100% web application, no downloads, no updates, with a clean design to allow all pilots of all aircraft on MS Flight Simulator, X-Plane, P3D to access ACARS functionality. FSM Works in any browser, so can be loaded on a device such as an iPad or a non-sim PC.

FSM Supports ACARS networks from [Say Intentions.AI](#) and [Hoppie](#) (for VATSIM). Pilots can use the exact same features and functions on both networks.

- Pre-departure clearances¹ based on your SimBrief plan
- Weather for any ICAO² (ATIS, METAR, TAF)
- ATSU logon and logoffs
- Telex free text outbound and inbound messages
- CPLDC inbound/outbound messages
- Requests to ATSU for:
 - Level change
 - Speed change
 - Direct to Routings
 - “When can we” questions
- Oceanic clearances

Forthcoming features include:

- A MS Flight Sim 2020 Toolbar panel to allow easy VR access
- Inbound and outbound VATSIM Direct and Network messages via a custom designed vPilot plug-in

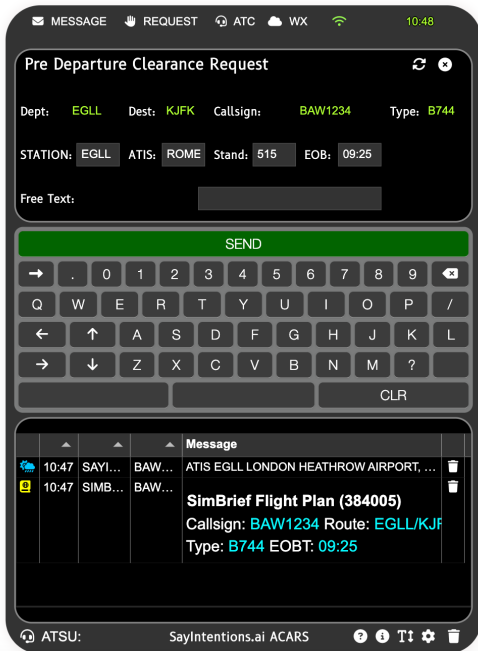

¹ Note: Limitations may exist for Hoppie/VATSIM subject to a CDPLC equipped controller being online

² Note: Limitations may exist for Hoppie/VATSIM subject to an airport being online
